Objective

Aspiring software developer and web designer with a strong foundation in programming, database management, and computer networks. Eager to apply technical skills to real-world projects while enhancing my knowledge in web development, Python programming, and GitHub collaboration.

Education

Master of Computer Applications (MCA) - SPU Mandi (Current)

Technical Skills

- Programming Languages: Python, C

- Web Development: HTML, CSS, JavaScript (Responsive Design)

- Database Management: DBMS (SQL)

- Tools & Technologies: GitHub (Beginner to Advanced), VS Code, Visual Studio

- Concepts: Computer Graphics, Software Engineering, Theory of Computation, Data Communication & Computer Networks

- Other Skills: Presentation Skills, Time Management, Effective Communication

Projects

Bus Timing Website

- Developed a responsive website for displaying bus timings with an enhanced search section, timetable section, and input field adjustments.

- Integrated animated visuals for a dynamic slide bar on desktop view.

Portfolio Website

- Designed a personal portfolio showcasing my skills, projects, and experience in web development.

Presentations & Workshops

- Union in C (For MCA 1st-year students)

- Program Input/Output in COA

- Modes of Transfer in COA

- Social Issues in Network Security

- Telnet and Remote Login Protocols

Learning Progress

- Currently learning Python with a focus on variables, operators, data types, conditional statements, loops, and

manipulation.

- Regularly practicing GitHub for efficient project management and code collaboration.

Time Management & Routine

- Dedicated 1 hour daily to web development courses.

- Allocated 1 hour daily for exercise to maintain a healthy balance.

- Balanced study schedule with 30-minute breaks after each subject for effective learning.

Hobbies & Interests

- Exploring new food and travel destinations.

Availability

- Preferred working hours: After 4 PM (Post college hours)
